

Mystery Shopping Program

See your practice through your client's eyes

Research shows that it is the quality of employee interaction which has the greatest effect on your customer's perceptions.

CCG's Mystery Shopping Program is specifically designed to identify your team's strengths, weaknesses and opportunities when dealing with clients. Its purpose is to improve customer service performance in the veterinary practice. As a component of the program, trained personnel will conduct multiple contacts with your practice. These contacts are conducted with total anonymity and confidentiality.

Benefits to your business include:

- Improved competitive edge through customer service and sales techniques
- Increased product sales and profitability
- Better use of training dollars with targeted sessions based on report outcomes

Find out more online:

www.provetccg.com.au/mysteryshopping

There are a number of scenarios available for you to choose from, or you may like to tailor a scenario to your practice. Our most popular scenarios include:

- New puppy
- New kitten
- Flea enquiry
- Heartworm enquiry
- Worming enquiry
- Vaccination enquiry

A comprehensive colour report will be provided to you that will enable you to review your customer service and benefit from the results.

You will be able to see what you do well, what areas you can improve on and what clients really think about the services you offer. This valuable information will enable you to streamline and focus on quality customer service for your valued clients as well as ensuring the practice develops and grows.

Add value to your Mystery Shopping Program with a Customer Service Intelligence program!
